CHARACTERISTICS OF THE CURRENT CANAL LENGTHS

It is recorded that Egypt was the first country to dig a canal across its land with a view to activate world trade. The first canal was dug under the reign of SENA USRET III, Pharaoh of Egypt (1849-1887 BC) linking the Mediterranean Sea in the north with the red sea in the south via the river Nile and its branches. The Canal was successfully reopened to navigation by SITY I (131 O BC), NKHAW (610 BC), Persian King DARIUSSLI POLEMY II (285 BC), Emperor TRAJAN (117 AD) and AMO IBN ELASS, following the Islamic conquest.

In modern times the Suez Canal is actually the first canal directly linking the mediterranean to Red sea. Excavation of the present Canal begun on April, 25 1859 and was opened for international navigation on November 1869, 17 . The Canal has been Closed five times.

The longest perion of closure was following the 1967 war, when the canal was closed during 8 years.

The Canal was reopened for navigation on June 1975, 5.
